

**TERRAMYCIN 200- oxytetracycline hydrochloride powder**  
**Phibro Animal Health**

-----  
**Terramycin® 200**  
**(oxytetracycline)**  
**TYPE A MEDICATED ARTICLE**

**Active Drug Ingredient:**

Oxytetracycline (from oxytetracycline dihydrate base) equivalent to  
oxytetracycline hydrochloride ..... 200 g/lb

**CAUTION:**

For use in manufacturing medicated animal feeds only.

**CAUTION:** Certain components of animal feeds, including medicated premixes, possess properties that may be a potential health hazard or a source of personal discomfort to certain individuals who are exposed to them. Human exposure should, therefore, be minimized by observing the general industry standards for occupational health and safety.

Precautions such as the following should be considered: dust masks or respirators and protective clothing should be worn; dust-arresting equipment and adequate ventilation should be utilized; personal hygiene should be observed; wash before eating or leaving a work site; be alert for signs of allergic reactions—seek prompt medical treatment if such reactions are suspected.

**STORE AT ROOM TEMPERATURE**

**FOR USE IN DRY FEEDS ONLY. NOT FOR USE IN LIQUID FEED SUPPLEMENTS.**

**Mixing and Use Directions**

Thoroughly mix the amount of this Type A medicated article according to the directions below with at least an equal amount by weight of feed formula ingredients prior to blending into a complete feed.

<b>Indications for Use</b>	<b>Oxytetracycline Amount</b>	<b>lb of Terramycin 200/ton</b>
<b>CHICKENS</b>		
Increased rate of weight gain and improved feed efficiency	10-50 g/ton Feed continuously	0.05-0.25
Control of infectious synovitis caused by <i>Mycoplasma synoviae</i> ; control of fowl cholera caused by <i>Pasteurella multocida</i> susceptible to oxytetracycline	100-200 g/ton Feed continuously for 7-14 days	0.5-1
Control of chronic respiratory disease (CRD) and air sac infection caused by <i>Mycoplasma gallisepticum</i> and <i>Escherichia coli</i> susceptible to oxytetracycline	400 g/ton Feed continuously for 7-14 days	2

Reduction of mortality due to air sacculitis (air sac infection) caused by <i>Escherichia coli</i> susceptible to oxytetracycline	500 g/ton Feed continuously for 5 days	2.5
<b>WARNING: At 500 g/ton level, withdraw 24 hours before slaughter. Zero-day withdrawal period for lower use levels. In low calcium feeds withdraw 3 days before slaughter. Do not administer to chickens producing eggs for human consumption.</b>		

## TURKEYS

For growing turkeys for increased rate of weight gain and improved feed efficiency	10-50 g/ton Feed continuously	0.05-0.25
Control of hexamitiasis caused by <i>Hexamita meleagridis</i> susceptible to oxytetracycline	100 g/ton Feed continuously for 7-14 days	0.5
Control of infectious synovitis caused by <i>Mycoplasma synoviae</i> susceptible to oxytetracycline	200 g/ton Feed continuously for 7-14 days	1
Control of complicating bacterial organisms associated with bluecomb (transmissible enteritis, coronaviral enteritis) susceptible to oxytetracycline	25 mg/lb of body weight daily Feed continuously for 7-14 days	4.15 <sup>1</sup>

**WARNING: At 200 g/ton use level or higher, withdraw 5 days before slaughter. Zero-day withdrawal period for lower use levels. Do not administer to turkeys producing eggs for human consumption.**

## SWINE

Increased rate of weight gain and improved feed efficiency	10-50 g/ton Feed continuously	0.05-0.25
Treatment of bacterial enteritis caused by <i>Escherichia coli</i> and <i>Salmonella choleraesuis</i> susceptible to oxytetracycline and treatment of bacterial pneumonia caused by <i>Pasteurella multocida</i> susceptible to oxytetracycline	10 mg/lb of body weight daily Feed continuously for 7-14 days	2.5 <sup>2</sup>
For breeding swine for control and treatment of Leptospirosis (reducing the incidence of abortion and shedding of leptospirae) caused by <i>Leptospira pomona</i> susceptible to oxytetracycline	10 mg/lb of body weight daily Feed continuously for not more than 14 days	2.5 <sup>2</sup>

## CALVES, BEEF CATTLE, AND NONLACTATING DAIRY CATTLE

For calves (up to 250 lb) for increased rate of weight gain and improved feed efficiency	0.05-0.1 mg/lb of body weight daily Feed continuously	0.025-0.05 <sup>3</sup>
For calves (250-400 lb) for increased rate of weight gain and improved feed efficiency	25 mg/head/day Feed continuously	0.125 <sup>4</sup>
For growing cattle (over 400 lb)		

for increased rate of weight gain, improved feed efficiency, and reduction of liver condemnation due to liver abscesses	75 mg/head/day Feed continuously	0.375 <sup>4</sup>
Prevention and treatment of the early stages of shipping fever complex. (Feed 3-5 days before and after arrival in feedlots.)	0.5-2.0 g/head/day	2.5-10 <sup>4</sup>
Treatment of bacterial enteritis caused by Escherichia coli and bacterial pneumonia (shipping fever complex) caused by Pasteurella multocida susceptible to oxytetracycline	10 mg/lb of body weight daily Feed continuously for 7-14 days	25 <sup>5</sup>

#### **SHEEP**

Increased rate of weight gain and improved feed efficiency	10-20 g/ton Feed continuously	0.05-0.1
Treatment of bacterial enteritis caused by Escherichia coli and bacterial pneumonia caused by Pasteurella multocida susceptible to oxytetracycline	10 mg/lb of body weight daily Feed continuously for 7-14 days	6 <sup>6</sup>

**WARNING: 5-day withdrawal before slaughter at 10 mg/lb dosage.**

- <sup>1</sup>If bird weighs 10 lb, consuming 0.6 lb of complete feed per day  
<sup>2</sup>Pig consuming 4 lb of complete feed per 100 lb body weight per day  
<sup>3</sup>If calf weighs 100 lb, consuming 2 lb of complete starter feed per day  
<sup>4</sup>Include in feed supplement based on consumption of 2 lb of supplement per head per day  
<sup>5</sup>If animal weighs 500 lb, consuming 2 lb of supplement per head per day  
<sup>6</sup>If lamb weighs 60 lb, consuming 1 lb of supplement per head per day

#### **NOT FOR HUMAN USE**

(oxytetracycline)

FOR USE IN DRY FEEDS ONLY. NOT FOR USE IN LIQUID FEED SUPPLEMENTS.

## Mixing and Use Directions

Thoroughly mix the amount of this Type A medicated article according to the directions below with at least an

equal amount by weight of feed for each ingredient prior to blending into a complete feed.

Indications for Use

Indications for Use	Oxytetracycline Amount	IN of Terramycin 200/ton
<b>CAVES</b>		
Increased rate of weight gain and improved feed efficiency	10-15 g/ton Feed continuously	0.05-0.25
Control of infectious organisms caused by <i>Mycobacterium avium</i> complex	100-200 g/ton Feed continuously for 7-14 days	0.5-1
Control of chronic respiratory disease (CRD) and air sac infection caused by <i>Mycoplasma gallisepticum</i> and <i>E. coli</i>	400 g/ton Feed continuously for 7-14 days	2
Reduction of mortality due to air sacculitis (see indication) caused by <i>E. coli</i> and <i>M. gallisepticum</i>	400 g/ton Feed continuously for 5 days	2.5

**WARNING:** At 100 g/ton level, withdrawal 3 days before slaughter. When this withdrawal period is not met, use 100 g/ton level. Withdraw 3 days before slaughter. Do not administer to animals producing eggs for human consumption.

<b>CAVES</b>		
For growing calves for increased rate of weight gain and improved feed efficiency	10-15 g/ton Feed continuously	0.05-0.25
Control of infectious organisms caused by <i>Mycobacterium avium</i> complex	100-200 g/ton Feed continuously for 7-14 days	0.5
Control of chronic respiratory disease caused by <i>Mycoplasma gallisepticum</i> and <i>E. coli</i>	400 g/ton Feed continuously for 7-14 days	2
Control of complicated bacterial organisms associated with <i>Mycobacterium avium</i> complex, <i>Mycobacterium</i> spp.	400 g/ton Feed continuously for 7-14 days	4.1*

**WARNING:** At 100 g/ton level or higher, withdrawal 3 days before slaughter. Zero day withdrawal period for owner use only. Do not administer to animals producing eggs for human consumption.

<b>CAVES</b>		
Increased rate of weight gain and improved feed efficiency	10-15 g/ton Feed continuously	0.05-0.25
Treatment of bacterial enteritis caused by <i>E. coli</i> and <i>Salmonella</i> spp. associated with <i>E. coli</i>	10 mg/kg Feed continuously for 7-14 days	2.5*
Treatment of bacterial enteritis caused by <i>E. coli</i> and <i>Salmonella</i> spp. associated with <i>E. coli</i>	10 mg/kg Feed continuously for 7-14 days	2.5*

**CAVES - BEEF CATTLE AND NONLACTATING DAIRY CATTLE**

For calves up to 250 lb for increased rate of weight gain and improved feed efficiency

For calves 250-400 lb for increased rate of weight gain and improved feed efficiency

For growing cattle over 400 lb for increased rate of weight gain and improved feed efficiency, and reduction of feed conversion ratio to feed efficiency

Prevention and treatment of the early stages of shipping fever complex. Feed 3-5 days before and after arrival in feedlot.

Treatment of bacterial enteritis caused by *E. coli* and *Salmonella* spp. associated with *E. coli*
